JOÃO SANTOS

FRONT-END DEVELOPER

ABOUT ME

I am a Web Programmer focused on Front-End development, from Portugal, I graduated in Computer Science at ISTEC - Instituto Superior de Tecnologias Avançadas and currently work as a consultant at Accenture.
I am an ambitious, punctual, hard-working and innovative person who fits well in any type of environment. In addition to the world of work, I have some passions/hobbies such as music, movies, games and going out with friends to recharge my batteries.

- HTML
- CSS
- SCSS
- Tailwind CSS
- JavaScript
- TypeScript
- AngularJS
- React
- NextJS
- Visual Studio Code
- Git
- GitHub
- PostgreSQL
- Postman
- Figma
- Windows

EXPERIENCE

Frontend Developer
Accenture Portugal
November 2022 - Present

- I developed a mobile application using React Native and worked on integrating the backend that was developed with NestJS.
- I collaborated on training an AI with regex to enhance its ability to detect and respond to unsafe messages.
- I worked on a project for the banking sector, focusing on AngularJS, where I played a fundamental role in developing the frontend of an application for the end user and in another project for the company's internal use.

Curricular Internship
Direção-Geral dos Estabelecimentos Escolares
March 2020 - August 2020

- I designed and developed a dynamic web application for a school information management system.

Curricular Internship
Direção-Geral dos Estabelecimentos Escolares
February 2018 - July 2018

- I designed and developed an internal messaging application for team collaboration. Additionally, I played a key role in configuring and installing Office 365, offering crucial helpdesk support for troubleshooting and resolving issues. I also managed the installation and configuration of Windows machines for team members.
